

Figure 1: Health Plan Rating by Doctor Listening Frequency

Red diamonds = group means; dashed line shows trend

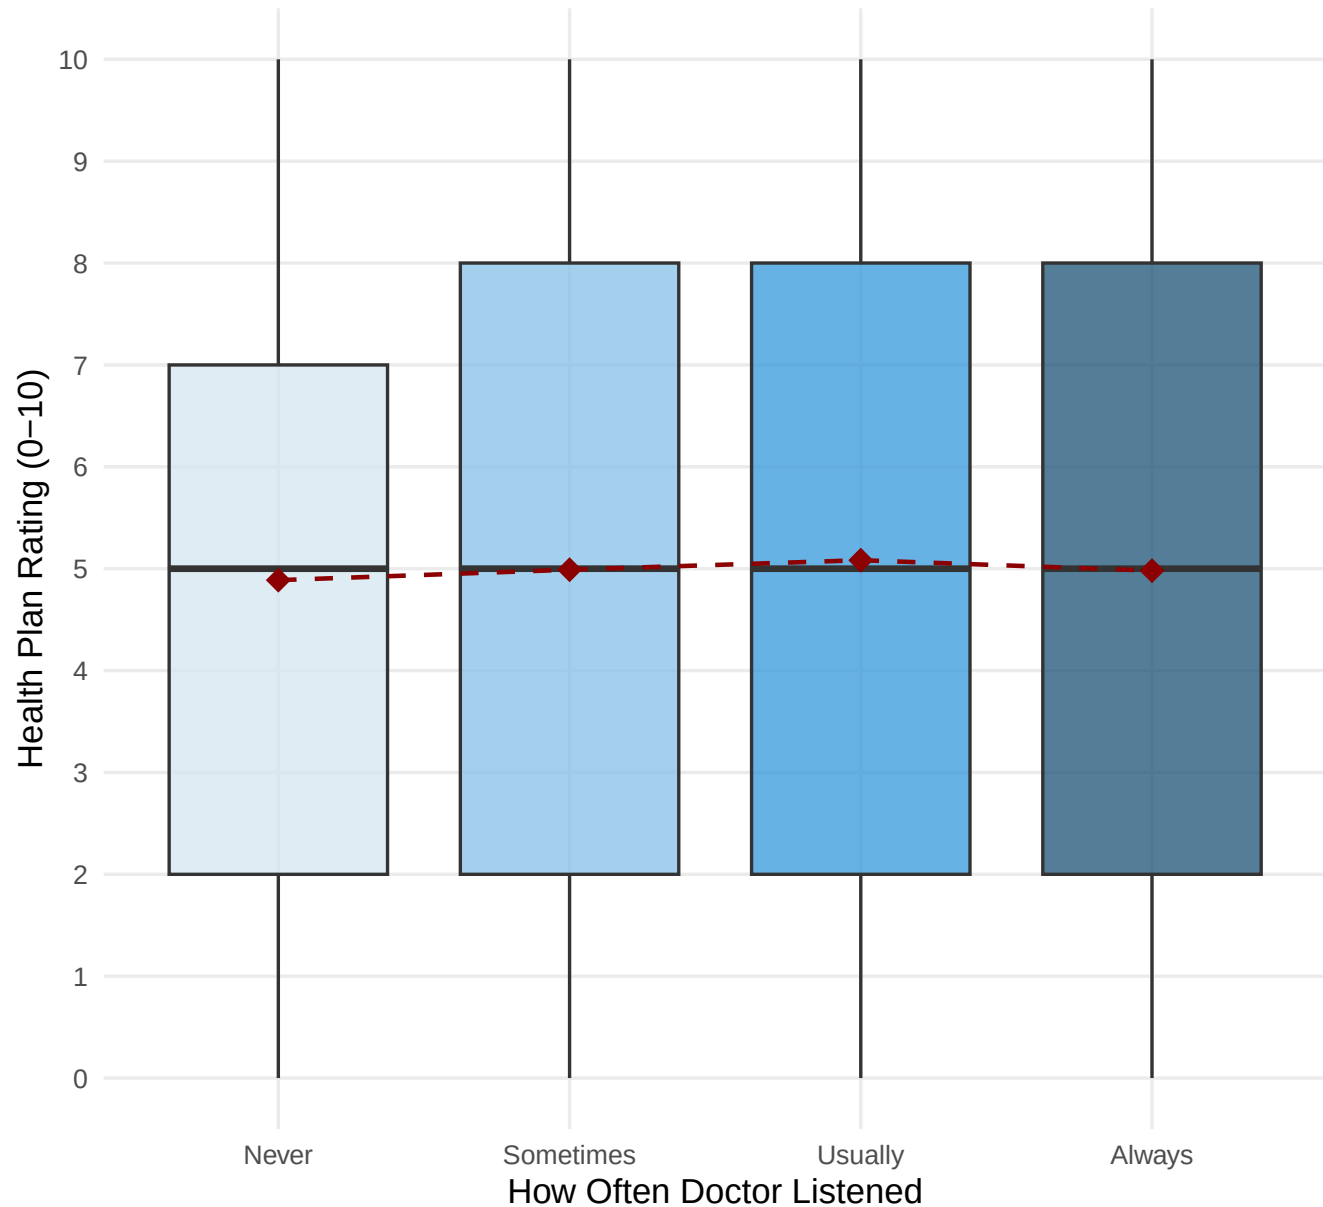

Figure 2: High Satisfaction Rate (HPR ≥ 7) by Doctor Listen

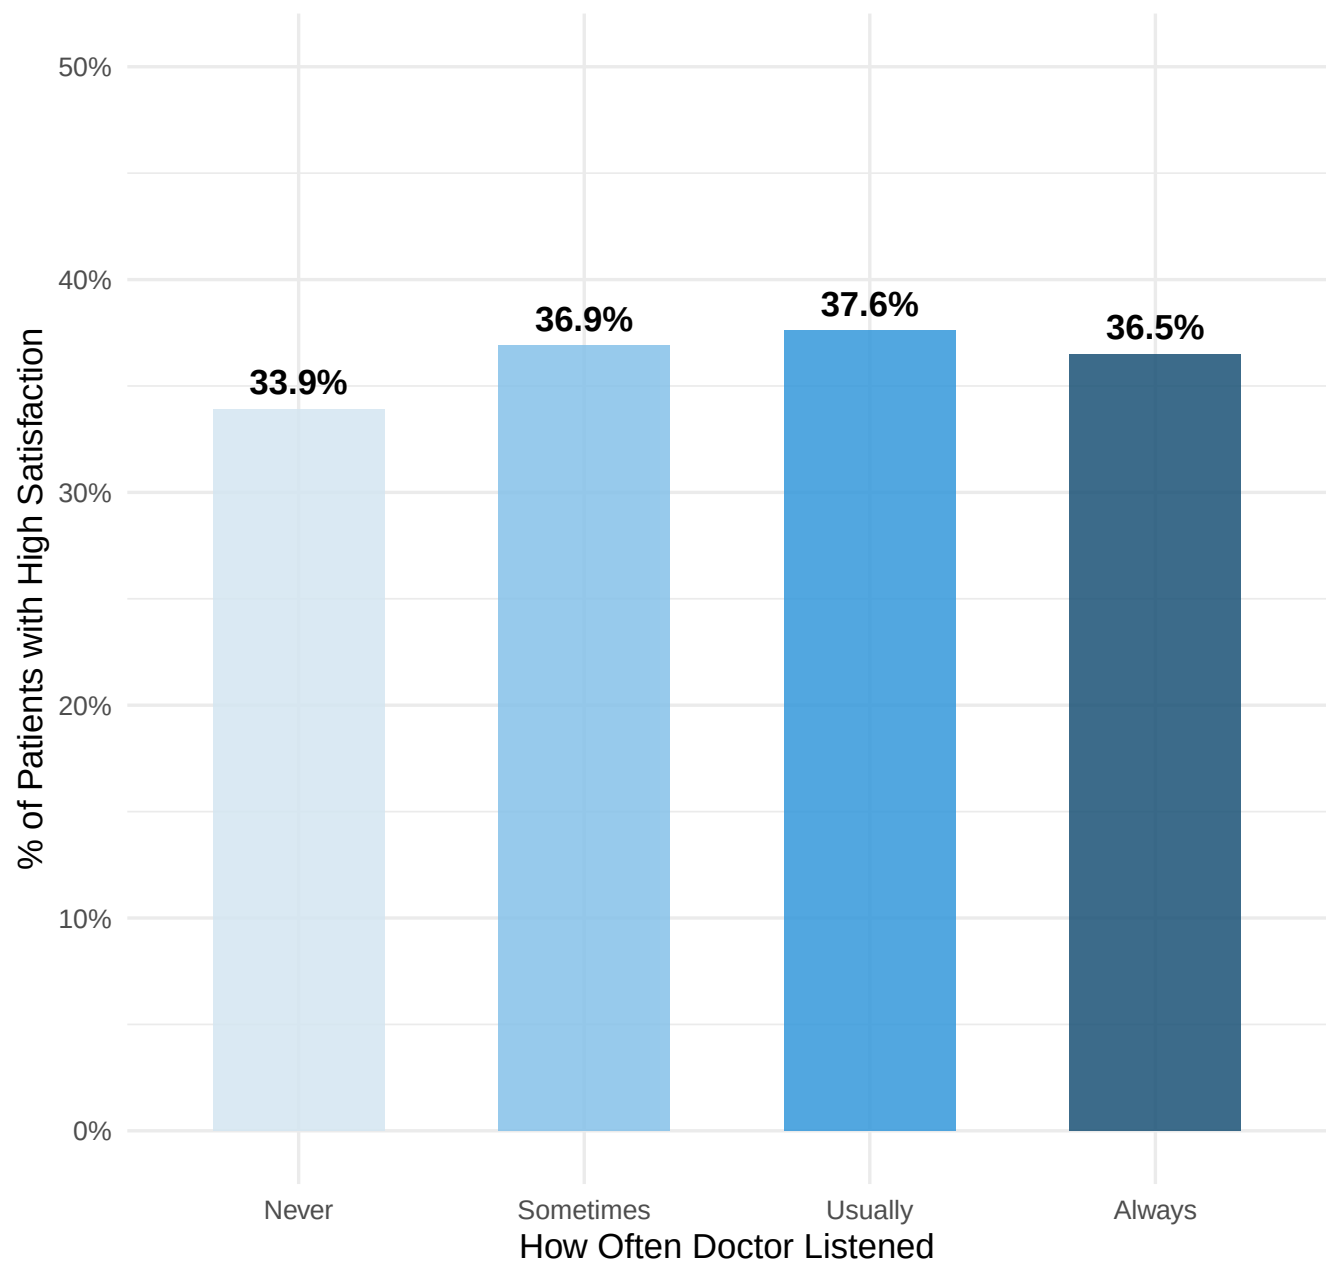

Figure 3: Distribution of Health Plan Rating (n=3,000)

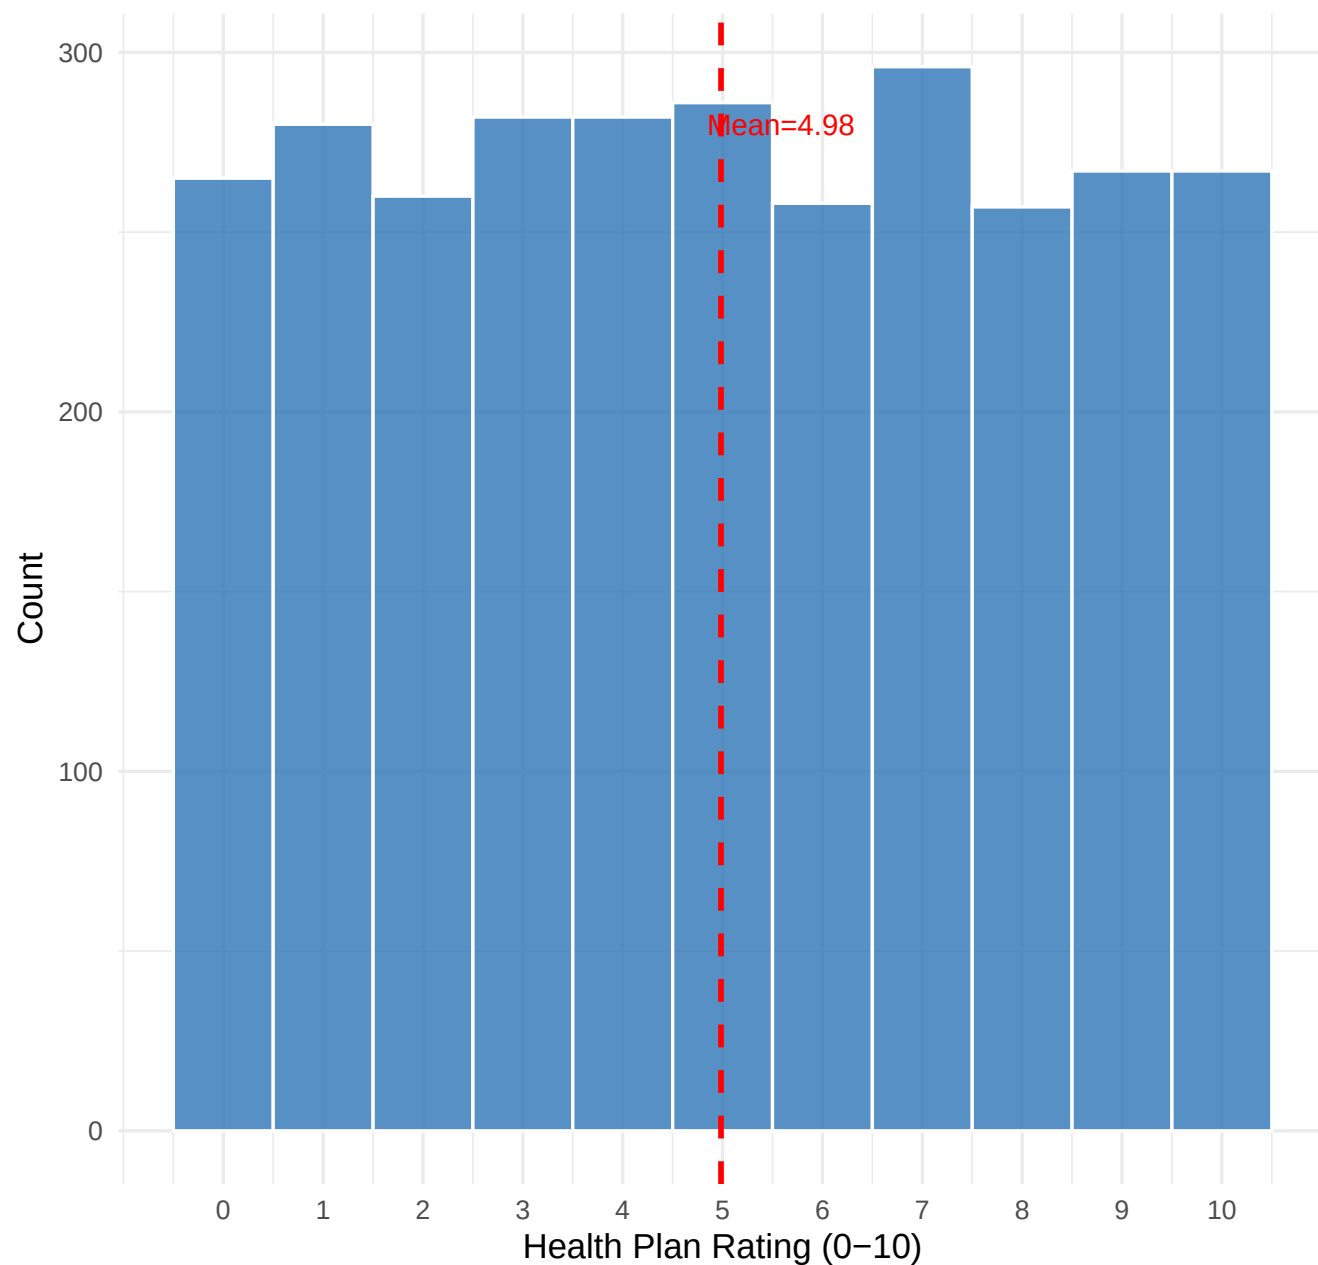

Figure 4: Distribution of Doctor Listening Responses

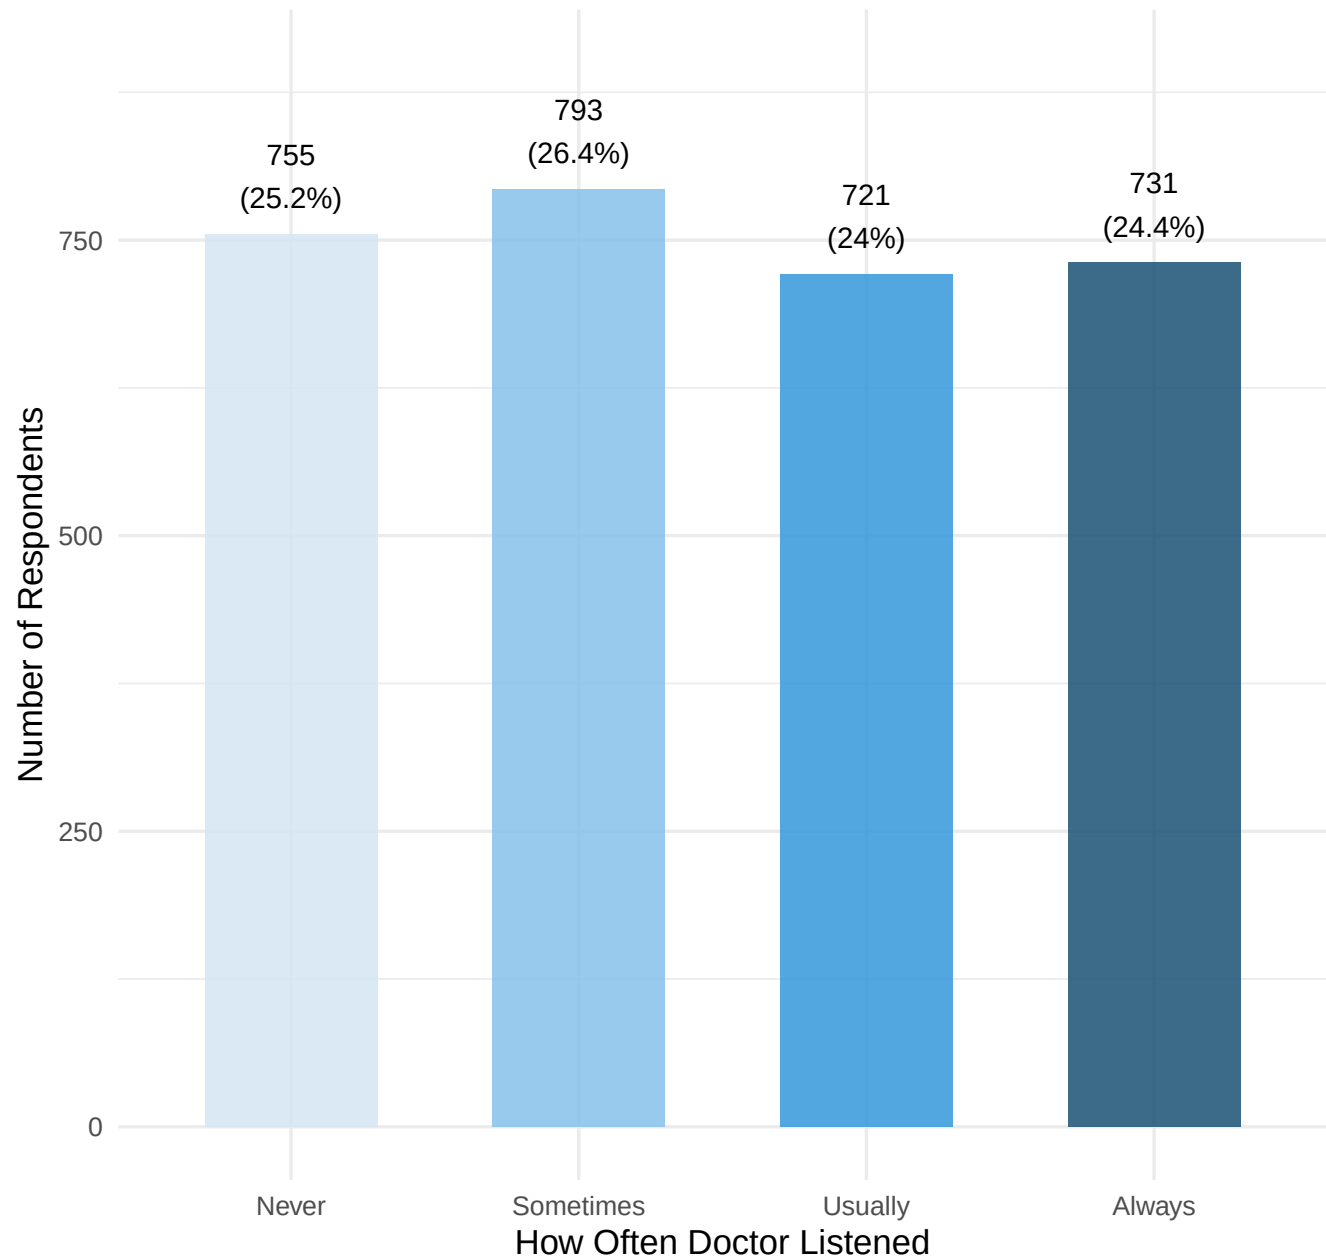

Figure 6: Predicted vs Actual Health Plan Rating (Full Model)

Test $R^2 = 0.0011$ | RMSE = 3.144

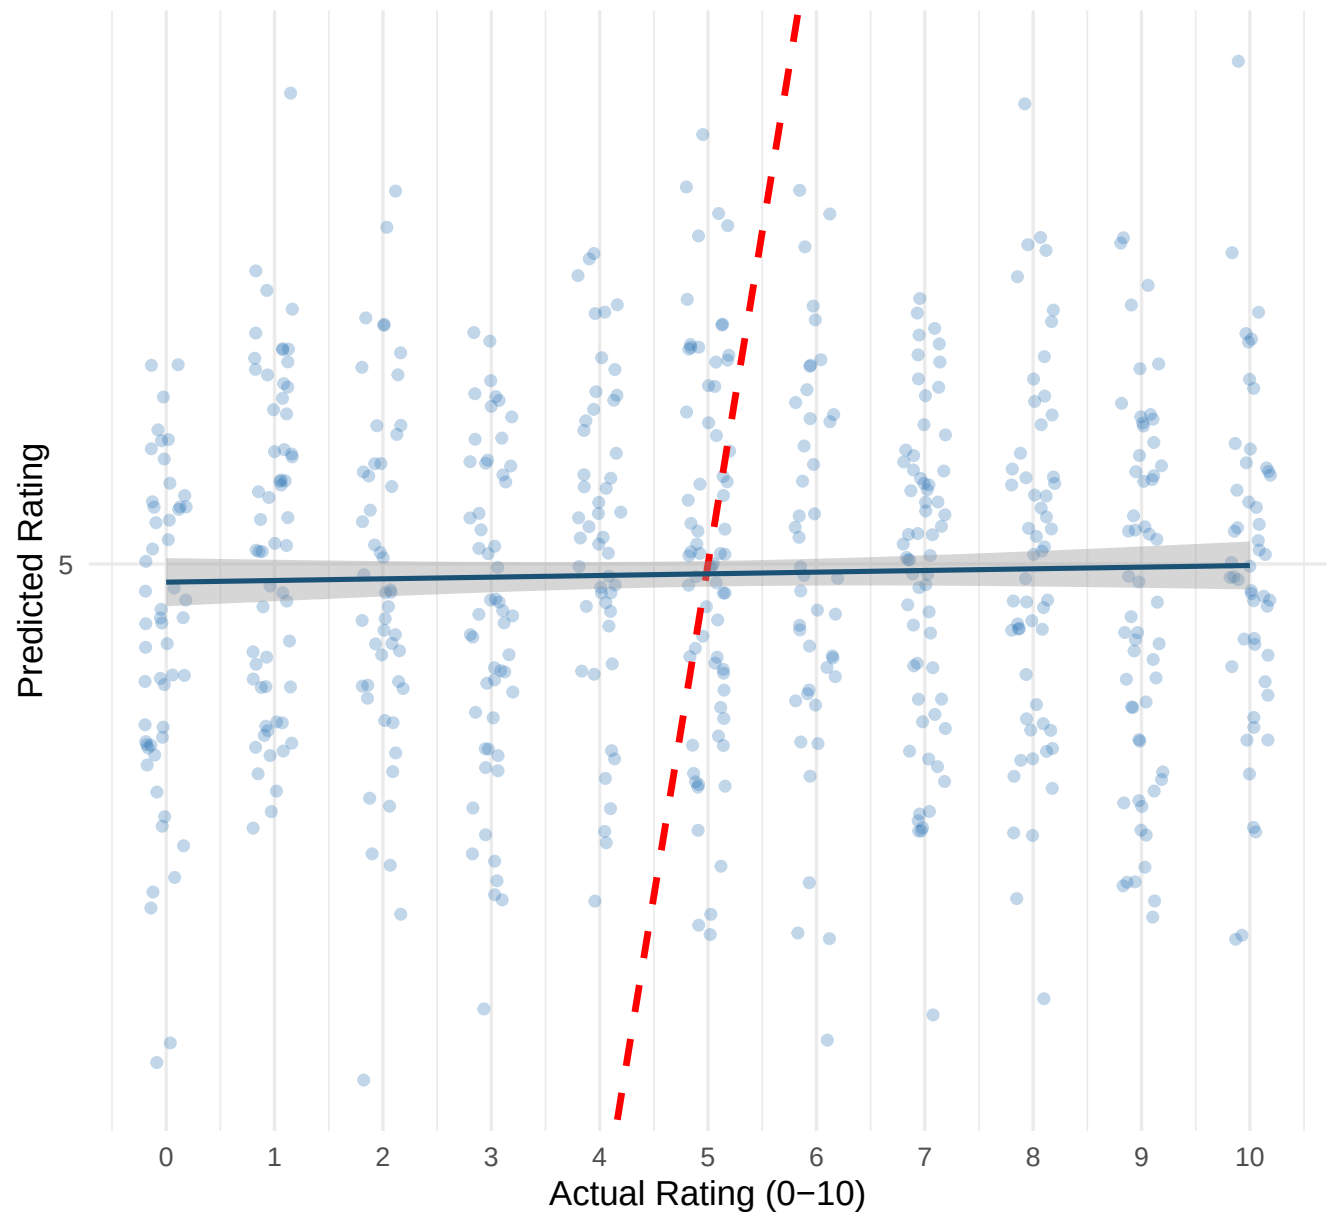

Figure 7: Regression Coefficients with 95% CI (Full Model)

Points right of zero increase predicted rating; left decrease it

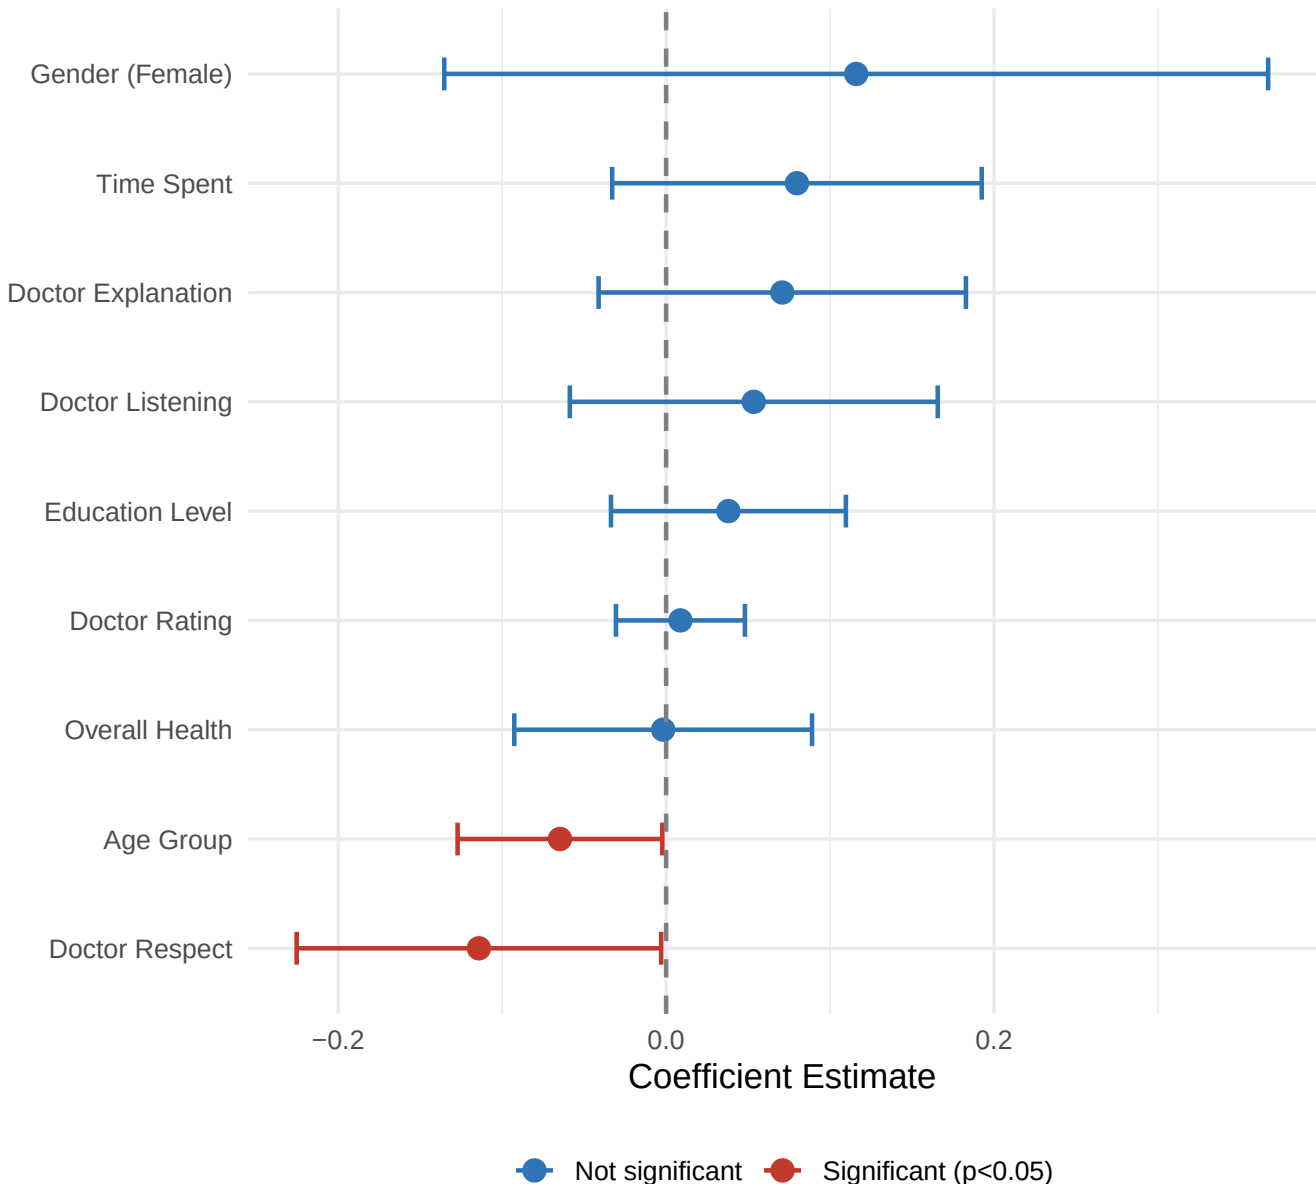

Figure 8: Residuals vs Fitted Values (Full Model)

Random scatter around 0 = good fit; patterns = model issues
